Is it possible to install ANY soft on a USB pen drive? I mean if I install a soft on my computer, it won't let me change it, it doesn't matter if it is free or not. Why is this happening? Re: Is it possible to install ANY soft on a USB pen drive? ANSWER: It's like that, because USB devices are "cloned" or "backup" of a computer file, so even if you install a soft on your computer and you copy it to a USB pen drive (or another computer), when you power off your computer, the copy to USB pen drive will be deleted. And as you ask to install any soft, the soft install a "mod" or "driver" on the USB pen drive, so if you don't like the "mod", you can always delete the software from your USB pen drive, to "return" the pen drive back to the state as when you took it out of your computer. Hi Anna! The usb stick you have plugged on your computer will show up as a drive letter on your computer. You can then safely unplug it and either remove the contents or copy them to a DVD, or USB drive if you want to preserve them. I would suggest you remove the software from your usb stick first to avoid potential problems. It's also worth noting that usb sticks have a maximum capacity of 1TB. If your usb stick only has 300GB of capacity you might want to buy a larger one, or make sure you don't use all the space on the one you have. Re: Is it possible to install ANY soft on a USB pen drive? ANSWER: Thank you for your kind answer. You are right, it's a cloned copy of a computer file, but as you say, it's enough to save it (that is, save a copy of the file), and then you can remove it. I don't know why, but the

Post by Tony on Jun 19, 2012 This screen saver has some lovely artwork and is also easy to use. I set it to work in the background for all of my desktop tasks, and it does just that: a cheerful Disney-esque background that works as a screen saver and wallpaper for all of your favorite applications. Great! Post by nickv on Apr 3, 2010 I like the Princess and the Frog in general. This screen saver is ok. It look better on Windows 7. The animation is very bad. Love it! Post by oo on Dec 7, 2009 I really like this screen saver. It is very well designed and I think this is the first screensaver that I have actually fallen in love with. I did have a problem with it though: It would run great on my laptop (Arch linux, KDE 3.5), but on my desktop (Ubuntu 8.04, KDE 4.2) it ran extremely slow. I tried uninstalling and then reinstalling the screensaver with no luck. I then installed the "block" option, and the screen saver runs very slowly without animation. I'll keep checking into it though, because I still think it is very useful. The Princess And The Frog Post by Gune on Dec 9, 2008 I love the screensaver, it is very colourful, and gives the computer a nice feel. It also has nice animal animation, and I like the chirping of the frogs. Great! The Princess And The Frog Post by kimbro on Oct 22, 2008 I like this screensaver, except the fact that it seems to be very slow on my computer. It's probably the reason why I prefer the classic screensavers. The Princess And The Frog is a very pretty, animated screensaver. I like this screensaver. Post by xtr0 on Oct 21, 2008 This screensaver is really cute and fun. It has good features and will look nice on
